About the CTSI
The UF CTSI is supported by NIH Clinical and Translational Science Awards UL1 TR000064, KL2 TR000065 and TL1 TR000066, and by significant matching commitments from UF’s Office of Research and College of Medicine.

Launches in 2012 as part of UF’s continuing commitment to excellence in health science research, the CTSI Academy of Research Excellence helps promote high-quality, innovative clinical research, with the highest regard for research integrity, ethics, professionalism and regulatory requirements. The academy promotes an atmosphere of professional collegiality and openness, including active role-modeling and the mentoring of junior faculty, research coordinators and students.

In February 2013, the academy launched its Research Coordinator Program for Excellence in Human Subject Research, which provides interactive, practical training for experienced research coordinators who work with human subjects and are committed to becoming exemplary leaders in human-subject research and protections. The CTSI offers additional professional development opportunities for research coordinators, including a CTSI Certificate of Basic Coordinator Training and the UF Research Coordinators Consortium.

Research Coordinator Program Overview
The academy’s practically-oriented Research Coordinator program will develop excellence in human-subject research focusing on regulatory requirements, informed consent training, and research integrity and professionalism. The 10-week program consists of 10 interactive, two-hour seminars; attendance at all sessions is required. It is designed for experienced UF research coordinators who work with human subjects.

Eligibility
This advanced program is intended for experienced UF research coordinators working with human subjects. Applicants must meet the following prerequisites:

- Review of the Belmont Report and DHHS Regulation 45 CFR 46;
- Successful completion of the UF IRB-01 Mandatory Training;
- Successful completion of the CTSI Informed Consent Training (CTS800);

Benefits
- Knowledge and skills that lead to the conduct of high-quality human-subject research
- Membership on the academy’s Research Coordinators Leadership Council, which will enhance leadership training, continuing education and mentoring opportunities for research coordinators at UF
- Significant recognition by the UF CTSI, including a letter and plaque upon successful completion of the program
- Opportunity to serve as leaders and peer mentors in the UF Research Coordinators Consortium
