The UF CTSI works on many fronts to improve research and health. It provides resources for research teams, career development programs, pilot project funding and an extensive network of local, state and national partners.

CTSI Web Portal
Visit the CTSI’s website for information about additional programs and research services: www.ctsi.ufl.edu.

CTSI Listserv
Subscribe to the CTSI listserv by emailing Claire Baralt at cbaralt@ufl.edu.

The UF CTSI is supported by NIH Clinical and Translational Science Awards UL1 TR000064, KL2 TR000065 and TL1 TR000066, and by significant matching commitments from UF’s Office of Research and College of Medicine.

About the CTSI

The CTSI KL2 Program provides two years of financial support and research training to develop the skills necessary to build a well-funded, collaborative career in clinical/translational research. Additional CTSI programs are available for faculty, fellows, medical students and research coordinators. Learn more at www.ctsi.ufl.edu/education.

KL2 Multidisciplinary Program for Junior Faculty

Eligibility for the KL2 Program
Junior faculty at the assistant professor level with an M.D., Ph.D. or equivalent degree in the health sciences are encouraged to apply. See the CTSI website for additional eligibility criteria.

Program Benefits
KL2 Scholars receive:
- Partial salary support each year for two years to cover approximately 75 percent assigned effort, plus fringe benefits;
- Support for research activities, textbooks and course supplies;
- Support for mentors’ research;
- Support to travel to one academic conference;
- Tuition and fees to enroll in courses of interest related to their research;
- Advice and oversight from the KL2 Multidisciplinary Advisory Committee.

Application Requirements
Applicants must propose a multidisciplinary clinical/translational research project; identify at least two mentors (one each from at least two different disciplines); secure guaranteed protection of 75 percent full-time professional effort for participation in the program (may be negotiable to a minimum of 50 percent effort for selected situations); and demonstrate related academic qualifications and career goals.

Program Requirements
KL2 Scholars conduct an independent research project that is clinical or translational in nature and designed to be completed in two years, although a component of the study may involve more prolonged follow-up. This project is expected to result in the submission of a multidisciplinary R01 grant (or equivalent) by the end of training. Scholars also must develop a mentoring plan outlining specific benchmarks including timelines for completion of the research project, meeting presentations, publications and grant applications, and planned didactic courses or degree programs.
